Model Kit features

The Macchi MC 202 Folgore represented a significant innovation for the fighter units of the Regia Aeronautica. Exceptionally beautiful from an aerodynamic point of view, it was equipped with the powerful German DB 601 inline engines produced under license by the Italian aeronautical industry. The new powerplants and the strength of the aircraft's design provided the Regia Aeronautica with a fighter capable of engaging Allied fighters on equal terms. Flight performance, compared with fighters of the previous generation equipped with radial engines such as the Fiat G-50 and the Macchi MC-200, was considerably better. Maneuverable and fast (it could reach 600 km/h), the early versions were armed with two 12.7 mm Breda-SAFAT machine guns mounted on the nose. Only in later versions the armament was enhanced to make it more suitable for aerial combat against American and British fighters.

- Super-detailed cockpit with 3D decals
- Canopy masking sheet
- Photoetched parts
- Realistic panel lines and rivets
- Open or closed flaps
- Colored painting and decals guide
- Decals sheet for 6 versions
